Analysis on Manifolds Solution of Exercise Problems

A few months ago, I wanted to learn something fundamental about manifolds. From highly recommend, I decided to choose Analysis on Manifolds by James R. Munkres as my self-learning textbook. Until now, I have finished the first two chapters' solutions. But I am not sure my answer to this exercise is absolutely right. Is there some solutions manual for this book?

Section 19: Problem 8 Solution Working problems is a crucial part of learning mathematics. No one can learn topology merely by poring over the definitions, theorems, and examples that are worked out in the text.

Thus it is most suitable for students who have just had a one-semester course in one-variable analysis. Spivak's text is a little bit more sophisticated, proving fewer theorems explicitly than Munkres and asking students to make the appropriate generalizations to proofs they've already seen.
