Is the human body badly designed? Refuting Human Errors: A Panorama of our Glitches by Nathan Lents. by Don Batten and Tas Walker. Published: 13 September 2018 (GMT+10) The headline "5 Design Fails of the Human Body (that you overcome every day)" was crafted to catch attention.

Is the human body badly designed? - creation.com

As I stated in my A-List Upper body PULLING exercises post, with the endless variety of exercises personal trainers and fitness enthusiast have from which to choose, it can be confusing to decide which exercises to use as the foundational (cornerstone) lifts for their strength training programs ...

A-List Exercises: Upper Body Pushing - Nick Tumminello

The gravitational force equivalent, or, more commonly, g-force, is a measurement of the type of force per unit mass - typically acceleration - that causes a perception of weight, with a g-force of 1 g equal to the conventional value of gravitational acceleration on Earth, g, of about 9.8 m/s². Since g-forces indirectly produce weight, any g-force can be described as a "weight per unit mass ...

Posture is the position in which you hold your body upright against gravity while standing, sitting or lying down. Good posture involves training your body to stand, walk, sit and lie in positions where the least strain is placed on supporting muscles and ligaments during movement or weight-bearing activities.

The Human Body Posture Specifically for the Elderly ...

There's a good reason so many people (mostly the sugar-burners, whose disparate group includes fruitarians, veg*ans, HEDers, body-builders, most MDs, the USDA and virtually every RD program in the country) can't seem to grasp why a lower carb, Primal approach to eating is a better choice for health and fitness: their fundamental paradigm - the core theory that underpins everything else ...

Why Fat, Not Carbs, Are the Preferred Fuel for the Human Body

r/collapse is a bunch of apocalypse fetishists as far as I can tell. Yes, we are doing irreparable harm to our planet that will very likely result in a mass extinction and an extraordinarily difficult period for humanity, if we get through it.

The space environment is so inconvenient for human beings. There is so much that one has to bring along to keep them alive. Life Support has to supply each crew member daily with 0.0576 kilograms of air, about 0.98 kilograms of water, and about 2.3 kilograms of (wet) food (less if you are recycling). Some kind of artificial gravity or a medical way to keep the bones and muscles from wasting away.
