HUMAN VERSUS MACHINE. Background. Each December, Nature produces Nature's 10: a selection of 10 people who mattered in science that year. Past covers have shown a "10" in a fun way related to a relevant scientific theme. This year, we decided to highlight artificial intelligence. Design challenge. But what does artificial intelligence look like - how does one visualize AI as art? We gave ...

Serolina delaria is an extremely trilobite-like marine isopod: Have you? Probably not. Trilobites have been extinct since before the age of Dinosaurs (about 251 million years ago), but some living creatures bear such close superficial resemblance to trilobites that they cause great excitement when encountered.

Shackleton is an impact crater that lies at the south pole of the Moon. The peaks along the crater's rim are exposed to almost continual sunlight, while the interior is perpetually in shadow (a crater of eternal darkness). The low-temperature interior of this crater functions as a cold trap that may capture and freeze volatiles shed during comet impacts on the Moon.
